

AspenAir Inside ● Healthy Air for you ● *Green for the world.*

What's Green about AspenAir?	What is the Benefit?
<i>Vastly improves the Quality of the Air you breathe</i>	AspenAir cleans the air in the home. The EPA ranks Indoor Air pollution as a <i>Top 5 Environmental Health Risk</i> in the United States. Especially at risk are people with allergies and respiratory issues.
<i>Low energy installation</i>	Our products are built to "bolt-on" or "snap-in" which means invasive construction processes are generally not required.
<i>Low energy operation (2 watts)</i>	Products use 95% less energy than most Electronic Air Cleaners. Saves you money and reduces your carbon footprint.
<i>Low energy maintenance</i>	Does not require the use of any high energy usage appliances such as vacuum cleaners, dishwashers, etc.
<i>Less energy consumed by FAU due to Low Static Pressure</i>	Low Static Pressure causes the air handler to consume far less energy (As much as 52% less initial static pressure than the competition).
<i>Recyclable filtration media</i>	100% recyclable fiberglass media.
<i>Built from recycled materials</i>	Our plastic chassis and face plates are made from recycled ABS material.
<i>Recyclable chassis</i>	100% recyclable plastic chassis and face plates.
<i>Recyclable packaging</i>	100% recyclable packaging.
<i>Harmless Cleaning</i>	No harmful chemicals, cleaners or processes required.
<i>LEED point capable</i>	During construction, after tenancy and for innovation.
<i>Promotes Good Health</i>	Our products nurture the health and well-being of occupants.
<i>Our Environmental Policy</i>	AspenAir strives to leave the environment better than we found it during the manufacture, sale, delivery, installation, maintenance, ongoing operation, and eventual disposal of our products. We will continue to strive to reduce waste and improve the percentage and amounts of recyclable and reused materials in our products. We support independent certification where applicable.
